Research Procedure:

A representative sample of 330 colleges and universities offering at least the BA or BS degree was selected from each of 50 states and the District of Columbia. Where possible, seven institutions of higher education were selected from each state with a representation of institutions ensured by using variation in institution size and public and private status as variables for selection. The first survey was mailed in 1979 to the vice-presidents of student affairs, who were requested to direct the survey to the most appropriate person(s) on their campuses. Non-respondents were sent a reminder 4 weeks after the initial mailing. The same procedure with the same population was used for the 1982, 1985, 1988, 1991, 1994, 1997, 2000, 2003, 2006, 2009, 2012, 2015, 2018 and 2021 surveys. Beginning in 2012, respondents were provided an additional option of completing the survey using on-line data collection software; the on-line data collection process was the preferred choice starting in 2018, with written submissions also accepted. The sample size reduced to 324 in 2015, 325 in 2018, 322 in 2021, and 319 in 2024 due to institutional closures.

Survey Response Rates:

1979 165 institutions 50%	1982 236 institutions 71.5%	1985 202 institutions 61.2%	1988 213 institutions 64.5%
1991 211 institutions 63.9%	1994 211 institutions 63.9%	1997 245 institutions 74.2%	2000 194 institutions 58.8%
2003 217 institutions 65.8%	2006 196 institutions 59.4%	2009 203 institutions 61.5%	2012 176 institutions 54.3%
2015 178 institutions 54.9%	2018 128 institutions 39.8%	2021 116 institutions 36.0%	2024 120 institutions 37.6%

Research History:

The College Alcohol Survey was conducted from 1979 to 2012 by Dr. David Anderson and Dr. Angelo Gadaleta. This research, conducted with no external funding, has used the same methodology for 45 years and 16 survey administrations. With Dr. Gadaleta's retirement, the research was co-directed with Dr. Santos for 2 survey administrations, and Dr. Anderson for 2021. Dr. Anderson partnered with researchers from The Higher Education Center in 2024 for the renamed College Drug and Alcohol Survey.
