e. Student Affairs

Ms. Sipes reported that the Student Affairs Subcommittee provided updated information regarding the Textbook Rental Service building project, shuttle bus operation, community service initiative, and Student Recreation Center improvements. The construction bid for the

TRS project was approved at the November Board of Trustees meeting. The construction timeline is expected to be approximately 12 months. After being outsourced for seven years, the shuttle bus operation is now being managed by the University.

Internal management of the shuttle bus service is more cost effective and will delay the need to request an increase in the student shuttle bus fee. An Office of Student Community Service has been established to engage students in more leadership and community service opportunities. The Student Recreation Center has completed a significant painting project of the facility and is installing a very large new fan in the lobby.
